About the Program

The best way to learn is by doing. Whether you are currently working as a clinician-scientist or are a healthcare provider who aspires to strengthen your investigational skills, the new Foundations of Clinical Research program will provide you with a solid foundation upon which you can build your career. This is a unique opportunity to learn from some of the most highly accomplished experts in the field to help you jump-start — or enhance — your research capabilities.

What to Expect

This highly interactive program provides crucial training as you explore the fundamentals of epidemiology and biostatistics. With an emphasis on high-quality research design, implementation, analysis and interpretation of data, FCR will prepare you to develop your own clinical research projects. Mastering these key skills will position you for a multifaceted career in clinical research. Through this program, you will also have a unique opportunity to network with other clinician-scientists from around the globe, allowing you to form new collaborations and further your successes.

Format

Foundations of Clinical Research is a six-month interactive program that provides you with the flexibility to balance your learning objectives with your professional responsibilities.

This blended-learning approach includes:
- 15 self-paced online lectures
- 8 interactive webinars
- 36 hours of focused symposia, tutorials and seminars
- 3 weekend intensive online workshops

About Harvard Medical School

Since the School was established in 1782, faculty members have improved human health by innovating in their roles as physicians, mentors and scholars. They’ve piloted educational models, developed new curricula to address emerging needs in health care, and produced thousands of leaders and compassionate caregivers who are shaping the fields of science and medicine throughout the world with their expertise and passion.
